Pedestal Cases

Products for the Display, Conservation and Storage Of Works of Art, Textiles and Objects The **C** - **Case** is an attractive, secure and affordable way to present your objects and works of art. The museum-quality acrylic vitrine lifts off for easy access to the object chamber. The display deck is fixed in place and is painted or laminated to match the pedestal. The C case can be outfitted with internal or wall-mounted label rails. The C case is not sealed or archival.

The **B - Case** is 100% archival and includes a sealed media chamber below the removable deck. An optional external port allows access to the desiccant chamber without moving display objects. The vitrine can be fastened with security screws or pneumatic locks, and these cases are frequently outfitted with LED lighting systems.

The **Y - Case** is a sealed archival case that provides maximum protection for sensitive objects, textiles and works of art. There is a locking cabinet below that allows access to the leveling plate and silica gel chamber. These are our most versatile cases and can include motion-activated LED lighting, pinnable and drillable object decks, and in-case security and environmental monitoring.

Since 1972, SmallCorp has been a leader in the design and manufacture of archival museum exhibit cases and museum quality picture frames.

We are a vertically integrated manufacturer working in acrylic, glass, metal, wood and textiles to create archival and durable exhibit solutions. Our capacity ranges from our line of standard frames and cases to customer designed projects, whether it is one piece or hundreds. Our goal is to work with the conservation, exhibition and artistic communities to make the highest quality products at a reasonable price. We believe collaboration creates value both for our clients and for their audiences.

We are proud to say our products are handmade in Massachusetts with solar power.

Capabilities

- Acrylic fabrication
- Aluminum and steel welding and finishing
- Cabinet work
- Fabric Lamination
- Powder coating and painting
- Sheet metal fabrication
- CNC sawing and routing
- LED and Fiber optic lighting

Unique Areas of Expertise

- Archival materials, adhesives and coatings
- Construction of sealed exhibit cases with air exchange rates as low as .02/day
- Design / construction of engineered picture framing and exhibit case solutions for small to very large objects
- Protection of objects from UV light damage

All of our cases can be adapted to include dimmable spotlights and dimmable, coloradjustable lightbars with optional motion sensors.

Pneumatic locking systems can be used to secure the pedestal cabinet and the vitrine.

Silica gel compartments can be made accessible from outside the case, so moving your object is not required.

B, Y and H-Cases accommodate internal text rail collars and external label rails that hold five inch tall inserts in varying lengths.
