

Table Cases

SMALLCORP
THE SMALL CORPORATION

Products for the Display, Conservation and Storage
Of Works of Art, Textiles and Objects

The **Flat Case** is a very popular sealed microclimate case manufactured from 100% archival materials, with a lift-off museum quality vitrine. The powdercoated legs (square or round profile) are easily removable for storage and transport. SmallCorp label rails lock in to the powdercoated aluminum collar on all of our table style cases, and the Flat Case can be outfitted with a variety of archival decks and lighting options.

Also sealed and archival, the **M - Case** is a more substantial option. The medex base can be finished in latex paint, plastic laminate or wood veneer. The museum-quality vitrine lifts off and can be fastened with security screws or pneumatic locks. Archival decks and external silica gel access are standard.

(Shown with optional raised deck)

The **L - Case** is the top of the line option. The hinged vitrine is supported by gas lifters and fastened with keyed compression locks. Silica gel is accessed through a dedicated exterior port, and many L Cases are upgraded to include motion-sensitive LED lighting, which reduces power consumption as well as exposure of your object to light.

Since 1972, SmallCorp has been a leader in the design and manufacture of archival museum exhibit cases and museum quality picture frames.

We are a vertically integrated manufacturer working in acrylic, glass, metal, wood and textiles to create archival and durable exhibit solutions. Our capacity ranges from our line of standard frames and cases to customer designed projects, whether it is one piece or hundreds. Our goal is to work with the conservation, exhibition and artistic communities to make the highest quality products at a reasonable price. We believe collaboration creates value both for our clients and for their audiences.

We are proud to say our products are hand-made in Massachusetts with solar power.

Capabilities

- Acrylic fabrication
- Aluminum and steel welding and finishing
- Cabinet work
- Fabric Lamination
- Powder coating and painting
- Sheet metal fabrication
- CNC sawing and routing
- LED and Fiber optic lighting

Unique Areas of Expertise

- Archival materials, adhesives and coatings
- Construction of sealed exhibit cases with air exchange rates as low as .02/day
- Design / construction of engineered picture framing and exhibit case solutions for small to very large objects
- Protection of objects from UV light damage

LED options include dimmable spotlights and dimmable, color-adjustable lightbars.

Pneumatic locking systems secure the vitrine.

Decks can be flat or angled and often include pinnable linen-wrapped ethafoam, or HDPE for mounting. Roll-out decks offer easy access to large objects.
